

Overture Technologies is a leading provider of decisioning technology for mortgage and student loan underwriting. We are growing rapidly and seek ambitious personnel who enjoy overcoming challenges and are comfortable working in a fast paced environment.

We have an excellent opportunity for an analyst to work on Overture's industry leading BRMS (Business Rules Management Systems) platform. This position will work closely with Overture clients and internal Subject Matter Experts to deliver complex business logic leveraging Overture's dynamic and user friendly platform.

As an entry level member of the team, you will learn how to analyze and solve business problems and represent complex business logic within our English language rules based decisioning tools. Additionally, you will learn the industry leading practices of our clients, which include top tier commercial banks, Wall Street firms and leading universities. This entry level position incorporates on the job instruction within an apprenticeship supervised by an experienced manager.

Overture offers competitive compensation and a full benefits package to fulltime employees.

Responsibilities:

- Develop a baseline understanding of the Overture suite of products
- Work with Overture Business Analysts to understand customer business requirements that need to be incorporated into our products
- Develop recommendations for how to reflect these business requirements as rules within our products
- Design, configure and implement the rules within our products
- Develop and execute unit testing scenarios that will ensure rules set accuracy
- Maintain these rules on an ongoing basis (weekly and/or monthly maintenance)

Qualifications:

- College Degree required
- Experience working in a software company or working on a software project
- Experience with other rules engines such as iLog and Mindbox a plus
- Mortgage industry experience a plus (e.g. loan origination exposure)
- 1 to 3 years of experience
- Strong logical and analytical skills
- Attention to detail
- Ability to work both independently and in teams
- Comfort with Information Technology is required
