

Business Analyst

We are looking for mid-level and senior business and technical analysts. Candidates must have experience in requirements analysis, system design, and testing, as well as mortgage industry experience. **Experience in designing and writing rule sets is highly desirable. Mortgage Industry experience is preferred.

Responsibilities include, but are not limited to:

- Designing and writing rule sets
- Leading clients to maximize the use of our software solutions.
- Working with institutional staff to complete requirements gathering and business process review, and re-engineering as needed.
- Generating deliverables and templates to support product development and implementation services.
- Communicating system/technical information to various audiences.
- Providing training on features and functions of the systems.
- Collaborating to develop and implement custom interfaces and solutions that meet a client's unique business needs.
- Analyzing and troubleshooting identified bugs/issues.
- Traveling may be required.

Qualifications we look for:

- Knowledge of If/Elseif logic constructs required
- Knowledge of Rule Engine and BPM products preferred
- Relevant job experience in an IT product development environment
- BA or BS degree (Prefer Accounting, Information System, Economics, or Business)
- Consulting or IT experience in financial services a plus
- Strong communication and problem solving skills
- A great deal of initiative, team spirit, and flexibility to travel

We would prefer a candidate with product development experience, integrating lending solutions experience, and familiarity with project management.

Please submit cover letter, resume, and three references to Gricel Soriano at gsoriano@overturecorp.com. The cover letter should outline experiences and roles and responsibilities with software development and implementation, as well as requirements including salary expectations.
