

# OVERTURE TECHNOLOGIES

Founded in 2000, **Overture** is the leading provider of decisioning software solutions that enable the transparent, accurate and flexible financing processes required for today\*s mortgage and higher education industries. The company is a pioneer in rules-based decision technology. All products developed by **Overture** embed the technology which enables business users to author business policy in structured English.

## Senior Software Engineer

We are looking for a senior software engineer/architect to be part of a core product development team. The candidate should have extensive exposure to different design patterns of software development. The candidate will be involved in all aspects of the software development lifecycle and will be part of a team, building a J2EE web application that uses Hibernate, Spring framework and Struts 2.0 as its web infrastructure.

The candidate should have five to ten years of relevant technical experience, excellent communication skills and the ability to articulate technical concepts with ease. Mortgage industry experience desirable. **Overture** promotes a self-managed work environment made up of technology experts who have developed software and services for many of the Fortune 500 companies in the Washington Metro area.

## Required Skills

- Java, J2EE
- Hibernate
- Webwork (Struts 2.0)
- Major RDBMS platforms
- Spring Framework
- XML **technologies**
- Experience in web services based integrations
- Exposure to MISMO and other mortgage industry standards

Please submit cover letter, resume, and salary requirements to Grisel Soriano at [gsoriano@overturecorp.com](mailto:gsoriano@overturecorp.com). Candidate must be authorized to work permanently in the U.S.
